Professional Summary

Results-driven Software Developer with strong expertise in Python, C++, C#, and backend development. Experienced in building scalable web applications and deploying machine learning models using Flask and REST APIs. Skilled in SQL, data analysis, and system design with hands-on project experience. Passionate about building efficient, real-world solutions.

Technical Skills

- **Languages:** C, C++, C#, Java, Python, JavaScript, SQL
- **Frameworks & Technologies:** Flask, REST APIs
- **Databases:** MySQL, SQL Server (Query Optimization, Joins, Indexing)
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib
- **Cloud & Tools:** Git, GitHub, VS Code, PyCharm, Basic AWS (Deployment Basics)
- **Core Concepts:** OOP, Data Structures & Algorithms, MVC Architecture, SDLC

Education

Bachelor of Computer Applications (BCA) — ERA University, Lucknow	2022 – 2025
Percentage: 74.38%	
XII (Science) — B.G.R.M. Inter College, Hardoi	2021 – 2022
Percentage: 72%	
X (Science) — Adesh H S School, Hardoi	2019 – 2020
Percentage: 76.5%	

Work Experience

Trainee – Python & ML Developer — Criterion Tech	Feb 2025 – Jul 2025
• Developed a full-stack House Price Prediction web application using Flask and Linear Regression achieving 85%+ prediction accuracy. • Designed RESTful APIs to handle user inputs and real-time predictions. • Integrated MySQL database and optimized queries for faster data retrieval. • Built responsive frontend interfaces using HTML, CSS, and JavaScript.	
AI/ML Intern — TechSaksham	Mar 2025 – Apr 2025
• Built a machine learning-based disease prediction system achieving 80%+ model accuracy. • Applied data preprocessing and feature engineering to improve model performance. • Developed an interactive Streamlit UI for real-time predictions. • Worked with structured datasets and improved data handling efficiency.	

Projects

House Price Prediction Web Application	GitHub
• Developed and deployed a web-based ML application using Flask, MySQL, and JavaScript. • Integrated backend ML model with frontend UI for real-time predictions. • Improved prediction accuracy and reduced response time through optimized logic.	
CloudPoint – Weather API Application	GitHub
• Built a weather application integrating Google Maps and Weather APIs for live data. • Designed user-friendly interface with real-time weather updates.	
Personal Portfolio Website	GitHub
• Designed and deployed a responsive portfolio website showcasing projects and skills. • Improved user experience with interactive UI and optimized performance.	

Certifications

Python with IoT — TECHPILE (2024)
Data Science & Analytics — hp LIFE (2024)
